Bedroom Areas 2	173

Intentionally Blank

User Guide To The Back Page

Where the front page of each card is a graphic summary of the process, the back page contains more detail and instruction

1 Soak the cloth in the solution

- Only use a non-woven cloth

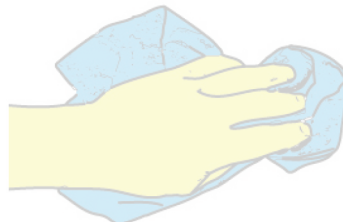

2 Wring out the cloth well

The same steps shown on the front have been duplicated on to the back

hazard
er onto the surface
be able to remove

3 Wipe over the surface

- There are 4 sides to a cloth and you keep turning and folding the cloth as you clean, so that the maximum amount of soil is picked up with the minimum amount of effort
- Finish by wiping over with a damp cloth

4 Wash out the cloth in the solution

- This removes the soiling from the cloth as does wringing out afterwards
- Change the water when it gets exhausted/dirty
- Repeat the procedure if rinsing and buff up the surface when dry with a dry cloth

Notes:

Simply add your own notes to suit your unique working environment
